WEB Card

### your contact information, always current
... anytime, anywhere

The contact information associated with your eCode is displayed as a graphical virtual business card. You can choose from a variety of card layouts, background colors, and logos, and create a card that best reflects your personality. You can update the information and the layout as often as you need. With your WEB Card, you'll never have to give out directions, because we offer you zero data entry maps and driving directions!

virtual address book
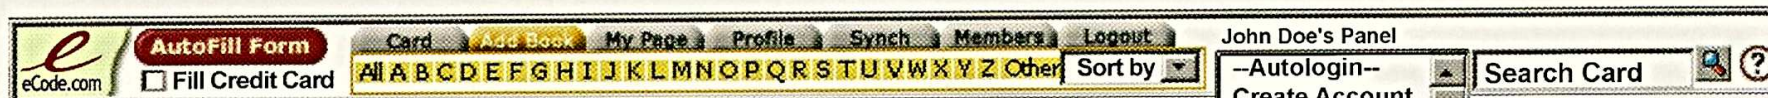

self-updating, self-populating

Collect the eCodes of your friends, family, and associates, in your eCode Address Book. You can add any WEB Card to your Address Book with a single click - no more data entry. Whenever they update their information, the changes are automatically and instantly reflected in your eCode Address Book.

AutoFiller™

technology that **fills** any
online form automatically

Save time filling out registration, order, and information request forms, through eCode's form-filling technology. The utility will give you a toolbar that resides on your desktop. When you want to fill out an online form, click the AutoFill Form button and the form will be automatically populated.

AutoLogin™

sign in with a
single click

Our AutoLogin feature allows you to access any of your online accounts without having to manually enter your User Name and Password each time. Once you create your AutoLogin accounts, they will be accessible to you on your personal AutoFiller toolbar. AutoLogin gives you an easy, secure, and error proof way to manage multiple user IDs and passwords!

eCode-enabling

get **accurate information**
from your **site visitors**

If you have your own Web site and some sort of a registration form in which your site visitors are required to enter their contact information, surely you know how frequently mistakes come up. eCode-enable your site and take the tedium out of filling forms for your visitors. All they need to do is enter their personal eCode to automatically fill out the form - and you get accurate information while making things easier for your visitors!

synchronization

consolidate
all of your **address books**

You can synchronize your eCode Address Book with Microsoft® Outlook™ and 3Com® Palm™ organizers by downloading and uploading your Address Books. eCode.com lets you consolidate and manage all of your online and offline address books with ease!
